Pune, Maharashtra, 401501 | 7821096574 | harshalm844@gmail.com | [Linkedin](#) [Github](#) [Portfolio](#)

CAREER SUMMARY

Full Stack AI Engineer skilled in MERN Stack, TypeScript, and Next.js development with expertise in AI Agents, Agentic AI systems, Prompt Engineering, and workflow automation using N8N. Experienced in building scalable AI-powered web applications, real-time communication systems using WebRTC, Socket.IO, and WebSockets, along with strong knowledge of SQL databases and NLP concepts. Passionate about creating modern SaaS platforms, automation tools, and intelligent real-time applications with efficient backend architectures.

SKILLS AND STRENGTHS

- **WEB DEVELOPMENT:** ReactJS , Node Js ,Express.js, Next.js, Rest APIs, Typescript, Tailwind.
- **Progarmming Languages:** C/C++ , Javascript, Java, Python.
- **Version Control :** Git , GitHub, Postman.
- **Databases:** SQL , MongoDB, PostgreSQL, Firebase, Neo4J.
- **AI Libraries:** Prompt Engineering, AI Agents, Agentic AI, NLP, N8N Automation
- **RealTime Technologies:** WebRTC, Socket.IO, WebSockets
- **Soft Skills:** Team Management. Mentorship. Leadership qualities. Communication.

PROFESSIONAL ACCOMPLISHMENTS

- Lead as a Developer and Finalist at National Level Offline Hackathon Hackoverflow 2.0 (2024).
- Google Developer Groups Lead and Organizer.
- Founder at Codevertex With Successful 50+ Clients.
- Best Mumbai College Speaker Award 2024.

WORK HISTORY

Founder & Senior Full Stack AI Developer | CodeVertex IT Solutions Private Limited, (Nov 2023 – Present)

- Founded and leading CodeVertex IT Solutions Private Limited, delivering full-stack web development, AI-powered solutions, and automation services for clients across multiple domains.
- Developed scalable web applications using MERN Stack, Next.js, and TypeScript with modern UI/UX practices and optimized backend architectures.
- Built AI-driven platforms and intelligent automation systems using Prompt Engineering, AI Agents, Agentic AI workflows, NLP concepts, and N8N integrations.
- Implemented real-time communication systems using WebRTC, Socket.IO, and WebSockets for chat, collaboration, and live interaction platforms.
- Managed end-to-end client communication including requirement gathering, project planning, solution presentation, delivery management, and technical consultation.
- Led and coordinated a team of 3 developers, overseeing task distribution, development workflows, debugging, deployment, and project execution.
- Designed and integrated REST APIs, authentication systems, MongoDB, and SQL databases for scalable SaaS and business applications.
- Managed deployment pipelines, version control, performance optimization, and maintenance using Git, GitHub, and modern development tools.

System Consultant Tech, in India, Web Developer Associate, (09/2023)- 11/2023)

- Developed AI-powered applications using OpenCV and MediaPipe for real-time image processing, gesture recognition, and computer vision-based solutions.
- Designed and integrated NLP-based systems for text analysis, chatbot development, and natural language understanding using modern AI techniques.
- Built intelligent automation workflows and optimized data processing pipelines to improve system performance, scalability, and operational efficiency.
- Collaborated with cross-functional teams to develop and deploy AI-driven solutions tailored to business requirements with scalable and robust architecture.
- Worked on backend integration, API development, and real-time system communication to support seamless AI application deployment.

Freelance Full Stack & AI Developer | Remote (02/2024)- 07/2024)

- Developed and deployed full-stack web applications using MERN Stack, Next.js, and TypeScript.
- Built AI-powered tools and automation workflows using Prompt Engineering, AI Agents, and N8N.
- Designed responsive and optimized frontend interfaces with React.js and Tailwind CSS.
- Integrated REST APIs, MongoDB, and SQL databases for scalable backend systems.
- Implemented real-time chat and communication features using WebSockets, Socket.IO, and WebRTC.
- Worked on SaaS platforms, automation dashboards, and AI-based productivity solutions.
- Managed version control, debugging, deployment, and performance optimization across projects.
- Collaborated with clients to understand requirements and deliver customized web solutions.

PROJECTS

AI Interviewer Platform

Built a full-stack AI-powered mock interview platform that simulates real technical interviews using voice interaction, resume-based question generation, and AI-driven answer evaluation. The system allows users to upload resumes, generate personalized interview questions using Gemini AI, answer questions via voice or text, and receive instant feedback with scoring and final performance reports. Implemented speech recognition and text-to-speech for real-time conversational interviews, along with resume parsing, ATS-ready dashboard UI, and interview analytics. Designed a scalable MERN-based architecture with secure authentication, REST APIs, and MongoDB data handling.

Tech Stack: React.js, TypeScript, Tailwind CSS, Node.js, Express.js, MongoDB, Gemini AI API, JWT, Web Speech API, Multer, Vite

AI Finance Buddy – Intelligent Personal Finance Management Platform

Developed an AI-powered personal finance management platform that helps users track expenses, monitor spending patterns, manage budgets, detect unusual transactions, and receive real-time personalized financial insights.

The platform leverages advanced AI-driven analytics, predictive budgeting, automated expense categorization, and an intelligent conversational assistant to simplify financial planning and decision-making. It also includes smart savings recommendations, financial goal tracking, anomaly detection, and explainable AI insights, delivering a secure, scalable, and modern fintech experience focused on improving users' financial awareness and money management efficiency.

Tech Stack: React.js, TypeScript, Tailwind CSS, Node.js, Express.js, MongoDB, Gemini AI API, JWT, Web Speech API, Multer, Vite

CERTIFICATIONS

- Google AI Essentials – Google
- Prompt Engineering for Developers – DeepLearning.AI
- MongoDB Node.js Developer Path – MongoDB University
- Introduction to Generative AI – Google Cloud
- AWS Cloud Practitioner Essentials – Amazon Web Services
- React & Frontend Development Certification – Meta
- Foundations of Cybersecurity – Google

ACHIEVEMENTS

- Founder & Team Lead at CodeVertex IT Solutions Private Limited.
- Successfully delivered 50+ client projects across web development, AI solutions, and automation systems.
- Lead Developer and Finalist at National Level Offline Hackathon Hackoverflow 2.0 (2024).
- Google Developer Groups (GDG) Lead and Organizer.
- Best Mumbai College Speaker Award (2024).
- Built multiple AI-powered SaaS platforms including AI Interviewer and AI Finance Buddy.
- Led and managed a development team of 3 members for scalable client and product-based projects.
- Developed real-time AI communication systems using WebRTC, Socket.IO, and WebSockets.

EDUCATION

Bachelor of Technology (B.Tech) – Computer Engineering

Bharati Vidyapeeth College of Engineering, Pune

Final Year Student | CGPA: 8.2
